

Don't let tooth loss age your smile!

MONKSTOWN DENTAL  
NEVER STOP SMILING

## Implant Supported Dentures

**Would you like to say  
goodbye to your dentures?  
We can help.**

*I was very impressed with the entire procedure starting with the consultation, the expert advice given and finally the successful treatment. I thought that Philip's professional, yet friendly manner and the skill with which he carried out the work was a credit to him. I would have absolutely no hesitation in recommending his services to anyone needing this type of treatment.*

Brian, Newtownabbey

# As if nothing ever happened...

*At Monkstown Dental we can help you regain your confidence and your smile by giving you a new set of teeth or a denture held in place by dental implants.*

## **It's your choice.**

Ask yourself the following questions.

- Do you have loose, uncomfortable or poorly fitting dentures?
- Would you like to eat what you like, rather than always having to choose the soft option?
- Would you like natural looking teeth that let you smile with confidence?

## **The best solution.**

With implant supported dentures you will be able to eat, talk and laugh. You will have a perfectly natural, secure smile that is very difficult or impossible to achieve with conventional dentures.

Our solution offers you:

- teeth that look and function as normal.
- the security of permanent fixing with the convenience of removable dentures.
- a solid foundation for natural chewing function, but easily removable for cleaning.

## **We're here to help.**

At Monkstown Dental we can provide you with dentures supported by implants. The benefits will change your life. Not only does it mean that you can eat anything you choose but they will also look, feel and work like natural teeth.

Fixed in place, they should last you a lifetime with regular check ups and professional maintenance.

Placing and restoring implants since 2001, Philip receives referrals from many local dentists. He is committed to continued education and is a member of the Association of Dental Implantologists and SAAD attending training courses all over the world.

*“Dental implant treatment is a very successful way of giving patients restorations that look, feel and work, as those they have lost. It has become one of my most popular treatments with patients telling me they wished they had done it sooner!”*
